Loma Linda University
Wong Kerlee International Conference Center
8:00 a.m. - 4:30 p.m.

Achieving anterior implant esthetics is a challenging and demanding procedure. To create implant restorations with harmonious gingival contours that emulate nature is a fusion of science and art. Understanding the biologic and physiologic limitations of the soft and hard tissue along with proper implant positioning will facilitate predictability in simple to complex esthetic situations.

In this one-day state-of-the-art symposium, you will witness a collage of anterior implant esthetic approaches encompassing orthodontics, periodontics and restorative dentistry. The speakers, who in their own rights are the authorities in their respective fields, have come together to share with you the latest philosophies and methodologies in achieving anterior implant esthetics. A panel discussion at the end of the day will allow the audience to interact with the speakers.

Credits

8 hours of California continuing dental education credit

Tuition

\$ 295 DDS
\$195 AUX / Staff

Registration

\$295 DDS

\$195 AUX
